## **GETTING INVOLVED – THE ENVIRONMENTAL WEEDS ACTION NETWORK (INC.):**

The Environmental Weeds Action Network (EWAN) is a community initiative to tackle the problems of environmental weeds in bushland and waterways. It brings together community members in both urban and rural areas, bush regenerators, local government, weed scientists and ecologists to save our indigenous flora from the threat of weeds.

### **The aims of EWAN include:**

- promoting an understanding of the threat of environmental weeds to our precious bushland
- providing useful information about weed control in native vegetation and elsewhere
- convincing governments at all levels of the need for appropriate legislation and funding for weed control
- researching methods of weed control
- encouraging community participation
